Dart static code analysis

Unique rules to write Clean DART Code

All rules 115 | Bug 15 | Code Smell 100

Tags | Impact | Clean code attribute | Search by name...

Extension identifiers should comply with a naming convention
Code Smell

Local identifiers should not start with underscore
Code Smell

If-null operator should be preferred
Code Smell

Null-aware operators should be preferred
Code Smell

Generic function type aliases should be preferred
Code Smell

Type parameters should not shadow other type parameters
Code Smell

"static final" declarations should be "const" instead
Code Smell

Interpolation should be used instead of String concatenation
Code Smell

Collection literals should be preferred
Code Smell

Conditional assignment should be preferred
Code Smell

"this" should only be used when required
Code Smell

Exceptions should not be ignored

Extension identifiers should comply with a naming convention

Analyze your code

Consistency - Identifiable | Maintainability

Code Smell | Minor | convention

Extension identifier, when present, should be in PascalCase.

Why is this an issue? | How can I fix it? | More Info

Code examples

Noncompliant code example

```
extension my_extension on String { // lower_snake_case
  void myMethod() {
    print('Hello');
  }
}
```

Compliant solution

```
extension MyExtension on String { // UpperCamelCase
  void myMethod() {
    print('Hello');
  }
}
```
