New features

FEATURE

Try Gemini in Android Studio

(<https://developer.android.com/studio/preview/gemini>)

Gemini in Android Studio is an AI assistant that helps you generate code, fix code, and answer questions about Android app development. Available in Android Studio Jellyfish.

FEATURE

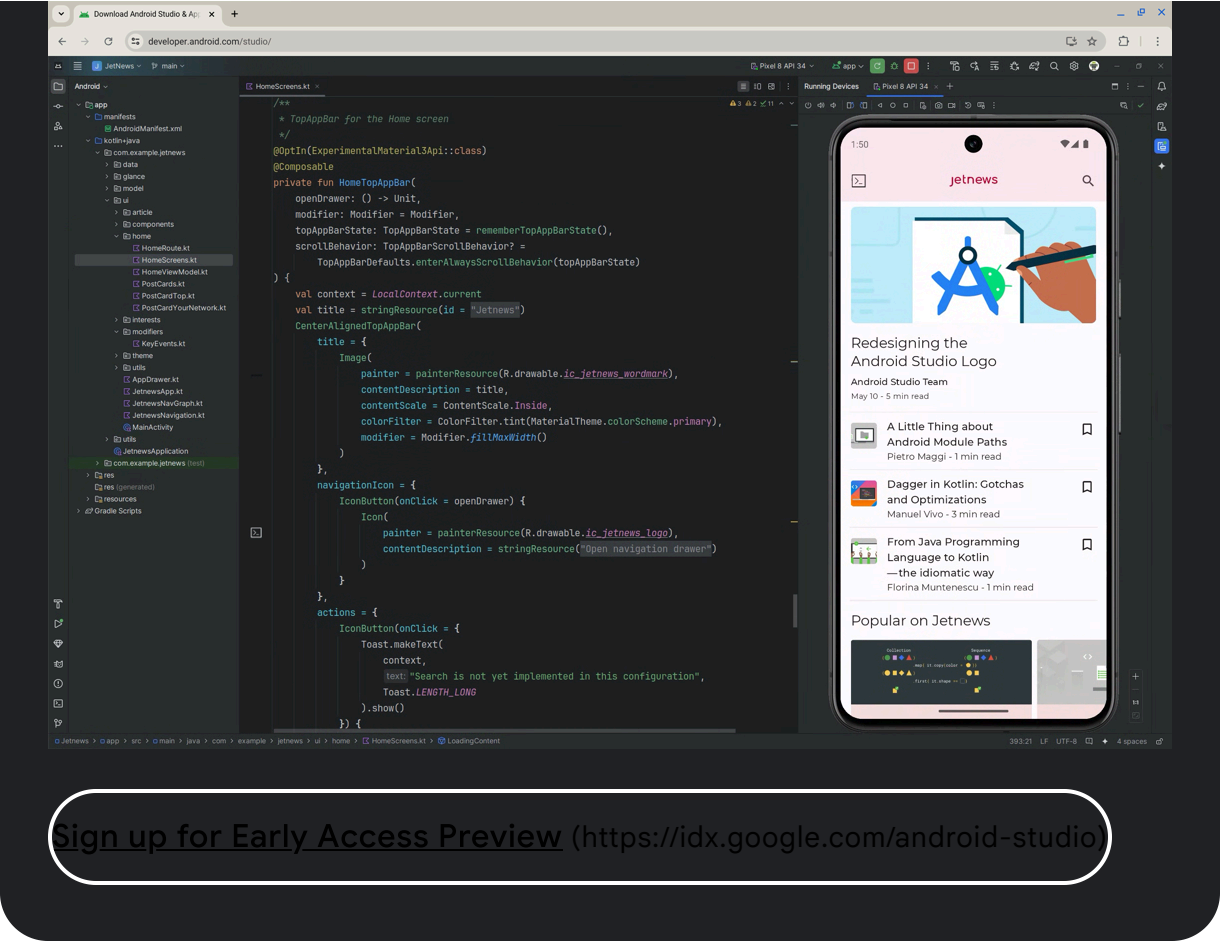

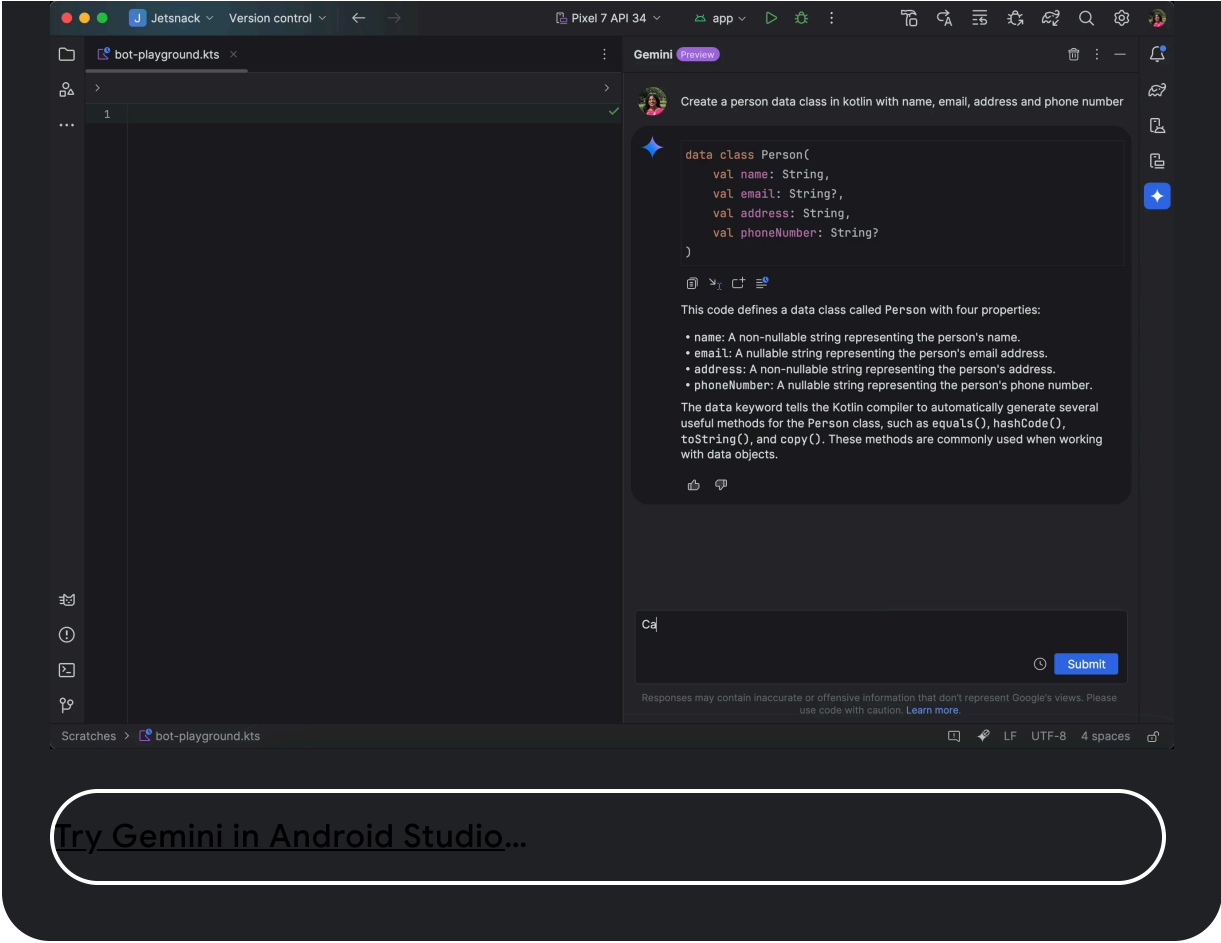

Android Studio in your web browser

(<https://idx.google.com/android-studio>)

Try Android Studio on IDX, a convenient way to open up samples, or an existing Android app project on GitHub in your web browser. Join the early access preview program to try it.

1/9

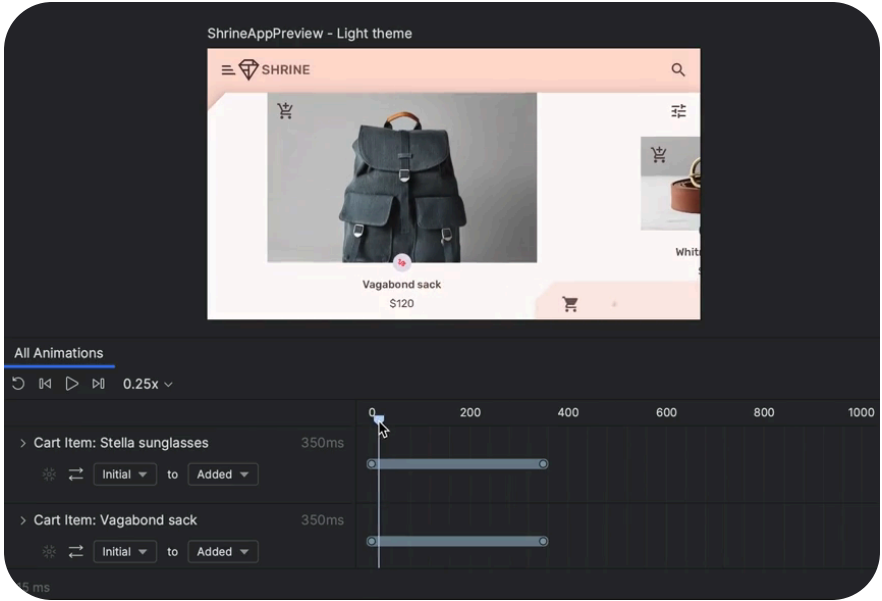

Core features

DESIGN

Compose design tools

Create dynamic layouts with Jetpack Compose. Then preview your layouts on any screen size and inspect Compose animations using the built-in inspection tools.

[Design with Compose \(/jetpack/compose\)](/jetpack/compose)

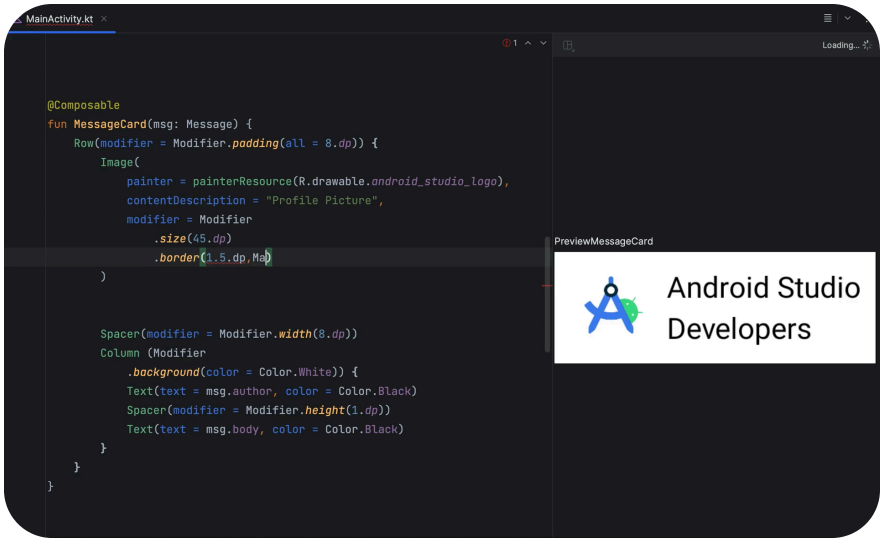

DEVELOP

Intelligent code editor

Write better code, work faster, and be more productive with an intelligent code editor that provides code completion for Kotlin, Java, and C/C++ programming languages. Moreover, when editing Jetpack Compose you can see your code changes reflected immediately with Live Edit.

BUILD

TEST

Flexible build system (<https://developer.android.com/studio/build>)

Powered by Gradle, Android Studio's build system lets you to customize your build to generate multiple build variants for different Android devices from a single project. Then analyze the performance of your builds and understand where potential build issues exist in your project with the Build Analyzer.

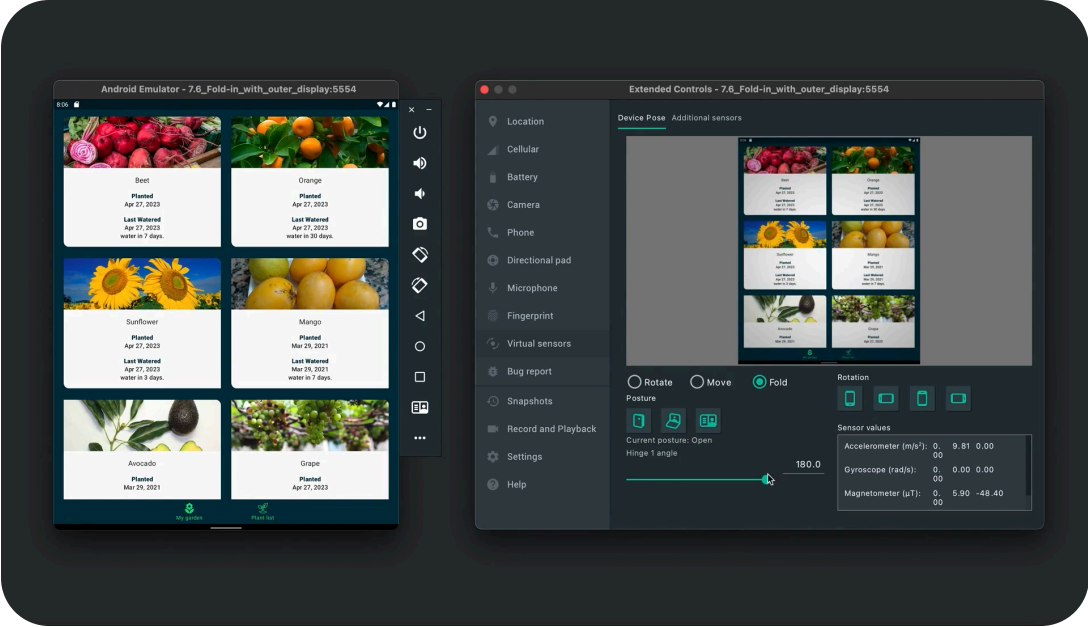

More about Android Build (<https://developer.android.com/studio/build>)

Easily emulate any device

(<https://developer.android.com/studio/run/emulator>)

The Android Emulator lets you to test your application on a variety of Android devices. Unlock the full potential of your apps by using responsive layouts that adapt to fit phones, tablets, foldables, Wear OS, TV and ChromeOS devices.

Use Android Emulator (<https://developer.android.com/studio/run/emulator>)

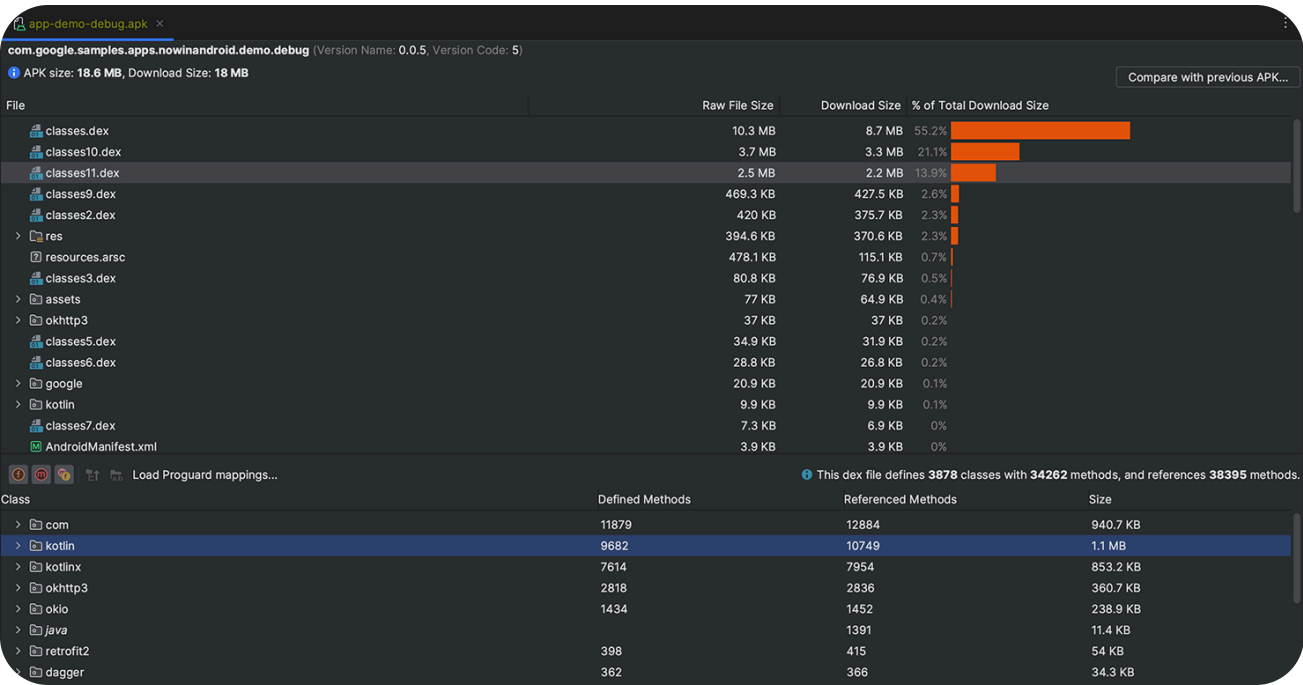

PUBLISH

Android App Bundle

(<https://developer.android.com/studio/debug/apk-analyzer>)

Find opportunities to optimize your Android app size before publishing by inspecting the contents of your app APK file or Android App Bundle. Inspect the manifest file, resources, and DEX files. Compare two APKs or Android App Bundles to see how your app size changed between app versions.
