Search by name...

Class names should comply with a naming convention

 Code Smell

Track uses of "TODO" tags

 Code Smell

Deprecated code should be removed

 Code Smell

Cyclomatic Complexity of functions should not be too high

 Code Smell

Constant names should comply with a naming convention

 Code Smell

Unnecessary nullable in final declaration should be removed

 Code Smell

Dependencies should be sorted

 Code Smell

Unused assignments should be removed

 Code Smell

Standard outputs should not be used directly to log anything

 Code Smell

Variables should not be initialized with "null"

 Code Smell

Files should end with a newline

 Code Smell

Class names should comply with a naming convention

 Minor ⓘ

 convention

Why is this an issue?

How can I fix it?

More Info

Shared naming conventions allow teams to collaborate efficiently. In Dart, the convention is that all type names should be in camel-case starting with a capital letter (aka Pascal case).

This rule raises an issue when a class name does not comply with this convention.
