Exceptions should not be ignored

 Code Smell

Code annotated as deprecated should not be used

 Code Smell

File names should comply with a naming convention

 Code Smell

Unused local variables should be removed

 Code Smell

Package names should comply with a naming convention

 Code Smell

Overriding methods should do more than simply call the same method in the super class

 Code Smell

"isEmpty" or "isNotEmpty" should be used to test for emptiness

 Code Smell

Unnecessary imports should be removed

 Code Smell

Empty statements should be removed

 Code Smell

Class names should comply with a naming convention

 Code Smell

Track uses of "TODO" tags

 Code Smell

Deprecated code should be removed

Exceptions should not be ignored

Intentionality - Clear

Maintainability ▾

 Code Smell

 Minor 

 cwe error-handling suspicious

Why is this an issue?

More Info

When exceptions occur, it is usually a bad idea to simply ignore them. Instead, it is better to handle them properly, or at least to log them.

Noncompliant code example

```
void save() {
  try {
    saveDocument();
  } catch (exception) {
  }
}
```

Compliant solution

```
void save() {
  try {
    saveDocument();
  } catch (exception) {
    log(exception);
  }
}
```

```
void save() {
  try {
    saveDocument();
  } catch (_) { // Compliant, ignored intentionally
  }
}
```

```
void save() {
  try {
    saveDocument();
  } catch (exception) { // Compliant, left a comment
    // ignored intentionally
  }
}
```
