Search by name... 

Class names should comply with a naming convention

 Code Smell

Track uses of "TODO" tags

 Code Smell

Deprecated code should be removed

 Code Smell

Cyclomatic Complexity of functions should not be too high

 Code Smell

Constant names should comply with a naming convention

 Code Smell

Unnecessary nullable in final declaration should be removed

 Code Smell

Dependencies should be sorted

 Code Smell

Unused assignments should be removed

 Code Smell

Standard outputs should not be used directly to log anything

 Code Smell

Variables should not be initialized with "null"

 Code Smell

Files should end with a newline

 Code Smell

Files should end with a newline

Consistency - Conventional

Maintainability 

 Code Smell

 Minor 

 convention

Why is this an issue?

Some tools work better when files end with a newline.

This rule simply generates an issue if it is missing.

For example, a Git diff looks like this if the empty line is missing at the end of the file:

```
+class Test {  
+}  
\ No newline at end of file
```
