Clean code attribute ▾

Search by name... 

Unnecessary imports should be removed

 Code Smell

Empty statements should be removed

 Code Smell

Class names should comply with a naming convention

 Code Smell

Track uses of "TODO" tags

 Code Smell

Deprecated code should be removed

 Code Smell

Cyclomatic Complexity of functions should not be too high

 Code Smell

Constant names should comply with a naming convention

 Code Smell

Unnecessary nullable in final declaration should be removed

 Code Smell

Dependencies should be sorted

 Code Smell

Unused assignments should be removed

 Code Smell

Standard outputs should not be used directly to log anything

 Code Smell

Unnecessary imports should be removed

Intentionality - Clear **Maintainability** ▾

 Code Smell  Minor ⓘ  unused

Why is this an issue? How can I fix it? More Info

While it’s not difficult to remove these unneeded lines manually, modern code editors support the removal of every unnecessary import with a single click from every file of the project.

Code examples

Noncompliant code example

```
import 'package:dart_hello_world/dart_hello_world.dart' as dart_hello_world;
import 'package:dart_hello_world/dart_hello_world.dart' as dart_hello_world; // Noncompliant: duplicate
import 'package:dart_hello_world/dart_hello_world.dart2'; // Noncompliant: unused

void main(List<String> arguments) {
  print('Hello world: ${dart_hello_world.calculate()}!');
  return;
}
```

Compliant solution

```
import 'package:dart_hello_world/dart_hello_world.dart' as dart_hello_world;

void main(List<String> arguments) {
  print('Hello world: ${dart_hello_world.calculate()}!');
  return;
}
```
