Dart static code analysis

Unique rules to write Clean DART Code

All rules **115**  Bug **15**  Code Smell **100**

Class names should comply with a naming convention		Code Smell
Track uses of "TODO" tags		Code Smell
Deprecated code should be removed		Code Smell
Cyclomatic Complexity of functions should not be too high		Code Smell
Constant names should comply with a naming convention		Code Smell
Unnecessary nullable in final declaration should be removed		Code Smell
Dependencies should be sorted		Code Smell
Unused assignments should be removed		Code Smell
Standard outputs should not be used directly to log anything		Code Smell
Variables should not be initialized with "null"		Code Smell
Files should end with a newline		Code Smell

 Code Smell

 Major 

 cwe unused

Why is this an issue?

How can I fix it?

More Info

Dead stores refer to assignments made to local variables that are subsequently never used or immediately overwritten. Such assignments are unnecessary and don't contribute to the functionality or clarity of the code. They may even negatively impact performance. Removing them enhances code cleanliness and readability. Even if the unnecessary operations do not do any harm in terms of the program's correctness, they are - at best - a waste of computing resources.

Exceptions

This rule ignores initializations to `-1`, `0`, `1`, `null`, `true`, `false` and `" "`.
