Unused local variables should be removed

 Code Smell

Package names should comply with a naming convention

 Code Smell

Overriding methods should do more than simply call the same method in the super class

 Code Smell

"isEmpty" or "isEmpty" should be used to test for emptiness

 Code Smell

Unnecessary imports should be removed

 Code Smell

Empty statements should be removed

 Code Smell

Class names should comply with a naming convention

 Code Smell

Track uses of "TODO" tags

 Code Smell

Deprecated code should be removed

 Code Smell

Cyclomatic Complexity of functions should not be too high

 Code Smell

Constant names should comply with a naming convention

 Code Smell

Unused local variables should be removed

 Code Smell  Minor ⓘ  unused

Why is this an issue?

How can I fix it?

More Info

The fix for this issue is straightforward. Once you ensure the unused variable is not part of an incomplete implementation leading to bugs, you just need to remove it.

Code examples

Noncompliant code example

```
int numberOfMinutes(int hours) {  
    int seconds = 0;    // Noncompliant: seconds is unused  
    return hours * 60;  
}
```

Compliant solution

```
int numberOfMinutes(int hours) {  
    return hours * 60;  
}
```
