Search by name... 

- Function declarations should be preferred over variables

 Code Smell
- Extension identifiers should comply with a naming convention

 Code Smell
- Local identifiers should not start with underscore

 Code Smell
- If-null operator should be preferred

 Code Smell
- Null-aware operators should be preferred

 Code Smell
- Generic function type aliases should be preferred

 Code Smell
- Type parameters should not shadow other type parameters

 Code Smell
- "static final" declarations should be "const" instead

 Code Smell
- Interpolation should be used instead of String concatenation

 Code Smell
- Collection literals should be preferred

 Code Smell
- Conditional assignment should be preferred

 Code Smell
- "this" should only be used when required

 Code Smell

Function declarations should be preferred over variables

Analyze your code

Consistency - Conventional

Maintainability 

 Code Smell  Minor   convention

Function declarations should be used, instead of variables.

Why is this an issue?

How can I fix it?
