Clean code attribute

Search by name...

Local identifiers should not start with underscore	Code Smell
If-null operator should be preferred	Code Smell
Null-aware operators should be preferred	Code Smell
Generic function type aliases should be preferred	Code Smell
Type parameters should not shadow other type parameters	Code Smell
"static final" declarations should be "const" instead	Code Smell
Interpolation should be used instead of String concatenation	Code Smell
Collection literals should be preferred	Code Smell
Conditional assignment should be preferred	Code Smell
"this" should only be used when required	Code Smell
Exceptions should not be ignored	Code Smell
Code annotated as deprecated should not be used	

Local identifiers should not start with underscore

Analyze your code

Consistency - Identifiable Maintainability

Code Smell Minor convention

In Dart, local variables don't have a concept of "private visibility" and should not start with an underscore.

Why is this an issue?How can I fix it?More Info

Code examples

Noncompliant code example

```
void doSomething(int myParam) {
  int LOCAL; // Noncompliant
  // ...
}
```

Compliant solution

```
void doSomething(int myParam) {
  int local; // Noncompliant
  // ...
}
```
